PROFESSIONAL SUMMARY

Full-Stack Engineer with 2+ years shipping production web applications end to end - interface, API, database and deployment. Builds front ends in React, Next.js and TypeScript and back ends in Python (FastAPI, Flask) and Node.js over PostgreSQL, with JWT authentication, Docker and CI/CD. Delivered five products for commercial clients, including a point-of-sale and CRM platform processing 100+ sales a day and a cloud document service holding 700+ records. Fluent English (C1), full daily overlap with US and European time zones.

PROFESSIONAL EXPERIENCE

Full-Stack Engineer (Contract / Freelance)

Jan 2024 - Present

Independent - Remote | Clients: Calitop Services, Lo Exacto, Revolt Laptop, GEOTOP

- Designed, built and shipped **5 production web applications** end to end - React / Next.js front end, Python or Node.js API, PostgreSQL schema and deployment on Vercel and Google Cloud.
- Built **Boom POS** front to back: a point-of-sale and CRM platform processing **100+ sales per day** across a **500+ product inventory** - Next.js App Router and Zustand on the client, Next.js API Routes and a Flask service on PostgreSQL - delivered in 2 months.
- Developed **SSP**, a FastAPI + SQLAlchemy 2 + PostgreSQL backend with JWT authentication, bcrypt hashing and role-based access control, replacing the mock data layer of an existing React front end and documented with OpenAPI / Swagger.
- Built and deployed **GEOTOP's** certificate platform: a Flask service on a **self-provisioned Google Compute Engine VM behind Nginx**, with **700+ certificates** in object storage and a QR code on each surveying instrument that resolves to its current calibration document.
- Delivered e-commerce catalogs and role-based admin dashboards for Calitop Services and Revolt Laptop, including a 40+ product catalog scoring **100 SEO / 100 Best Practices / 94 Accessibility** on Google Lighthouse.
- Owned the complete client lifecycle in English and Spanish: requirements, technical proposals, architecture, delivery, Docker / CI-CD setup and post-launch support, working directly with non-technical business owners.

SELECTED PROJECTS - ALL LIVE IN PRODUCTION

Boom POS - Point of Sale & CRM - boom-pos.vercel.app | Next.js, React, TypeScript, Zustand, API Routes, Flask, PostgreSQL

SSP - Internship tracking API - github.com/BastleyNait/BACK-CS-DE-LA-COM | FastAPI, SQLAlchemy 2, PostgreSQL, JWT, RBAC, Docker Compose

Calitop Services - Corporate platform & catalog - calitop-services.com | Next.js, React, PostgreSQL, Tailwind CSS, Vercel

GEOTOP - Certificate service with QR verification - github.com/BastleyNait/GEOTOP-PDF | Flask, Nginx, Google Compute Engine, S3-compatible object storage

Anemivision - Offline on-device anemia screening (Android) - github.com/BastleyNait/ANEMIVISION | Kotlin, TensorFlow Lite, PyTorch, Computer Vision

TECHNICAL SKILLS

Frontend: React, Next.js (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, Zustand, React Context, HTML5, CSS3, Responsive Design, Web Accessibility, Bootstrap, Vue.js

Backend: Python, FastAPI, Flask, Django, Node.js, SQLAlchemy, REST APIs, GraphQL, JWT Authentication, RBAC, Next.js API Routes, Microservices

Databases: PostgreSQL, MongoDB, SQL, Redis, Vector Databases (ChromaDB), Schema Design

Cloud & DevOps: Google Cloud Platform (Compute Engine), Vercel, Nginx, Linux (Ubuntu), Docker, Docker Compose, CI/CD, Git, GitHub, GitHub Actions, S3-compatible Object Storage, Reverse Proxy

Testing & Practices: Unit / Integration / End-to-End (E2E) Testing, Code Review, Agile, Scrum, Kanban, Software Architecture, Design Patterns, Clean Architecture, OWASP Top 10

Mobile & AI/ML: Kotlin, Android, React Native, TensorFlow Lite, PyTorch, RAG, Semantic Search, Pandas, NumPy

EDUCATION & LANGUAGES

Systems Engineering - Universidad Nacional de San Agustin de Arequipa (UNSA), Peru

Languages: Spanish (Native) · English - C1 Advanced, professional working proficiency
